Edgefinity IoT

The Hotel Staff and Asset Tracking System

Edgefinity IoT is the staff security industry's most advanced RTLS (Real Time Location System) — designed to give you a whole new approach to securing your hotel staff and assets as well as enhancing operations in Housekeeping, Food Service, Meeting Services, and other departments.

Isn't it time you had a good night's sleep?

IMMEDIATE ALERTS
When an incident occurs, Edgefinity sends out texts & alerts to the people who need to know to ensure quick, effective action.

RAPID R.O.I.
With Edgefinity's system, you can mitigate potential issues such as serious injuries, lawsuits, and other financial burdens.

KEEP STAFF SAFE
Give your staff all the tools to stay safe, while ensuring they always stay on task and on the premise - even when you're not there.

SMART REPORTING
Edgefinity ensures every incident is taken care of effectively. Edgefinity also records how every incident was handles for archiving.
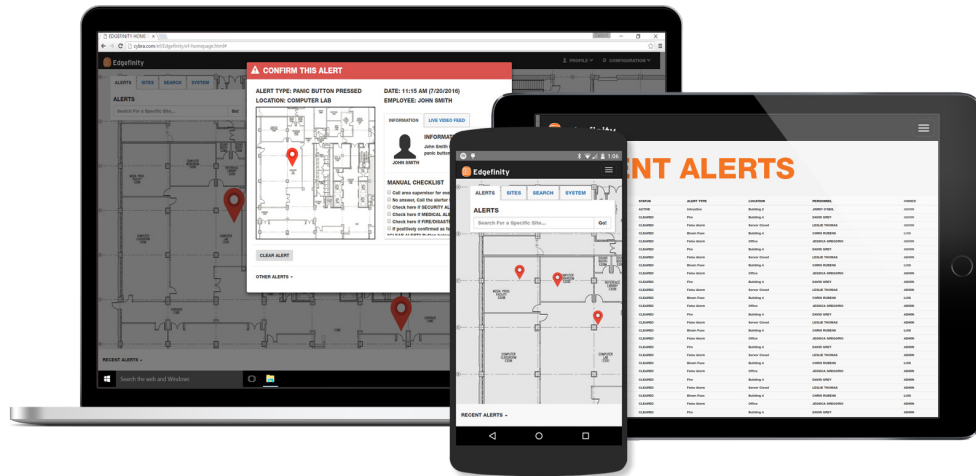

Edgefinity IoT
BY CYBRA

SECURE YOUR STAFF WITH ONE SIMPLE SOLUTION.

Face it. The last place you want your facility to be found is on the front pages of the newspapers. Your guests want peace and quiet. And your staff deserves to work in a secure environment. With terror and staff safety concerns on the rise, you need new and inexpensive ways to create a truly safe environment.

A multi-platform web-based solution for developing RFID and RTLS applications, Edgefinity software is a robust software environment perfect for hotel staff and asset tracking. Edgefinity's Hotel Staff and Asset Tracking System is an easy to install messaging and tracking solution.

STAFF SAFETY
Provide staff members (and their families) with peace of mind. Staff can act in case of an emergency using customizable call buttons on their staff badges.

THEFT PREVENTION
Notify security before an asset exits the building. Laundry tags can be used to reduce lost bed linens, towels, and banquet tableclothes.

STAFF TRACKING
Edgefinity IoT enables you to track staff ensuring optimized work flow. Track employees and ensure they're on task wherever you are - on your phone, tablet, or computer.

IMPROVE GUEST EXPERIENCE
Temperature tags can monitor refrigerators and freezers notifying Catering and Food Service Managers the moment temperatures rise or fall outside optimum ranges.

RAPID R.O.I.
Edgefinity IoT offers rapid Return On Investment due to its ease of installation, no hardwired infrastructure requirements, and scalability both in coverage and functions.

OPTIMIZED ASSET USE
Ensure expensive equipment won't get lost and is constantly being used in an optimized fashion to maximize work flow, and prevent the purchase of unnecessary new equipment.

DEVELOPED BY CYBRA CORPORATION

CYBRA has over 30 years of experience in software development and RFID technology. Since 1985, CYBRA has been solving some of the most vexing auto-ID challenges in the world. Edgefinity is a complete safety solution for any organization.
