

HOSPITALS AND HEALTHCARE

RFID Inventory & Asset Management System

Healthcare organizations must track assets and ensure patient and staff security. With some 15 percent of hospital equipment stolen annually, and a significant amount of equipment not properly utilized, RFID tags offer a compelling solution to real-time asset tracking, risk-free mobility of equipment and avoidance of wasteful procurement.

Until now, RFID technology required significant specific software developments, at prohibitive costs for healthcare organizations. These solutions were also hard to maintain over the years as the entire maintenance costs were borne by each single customer; consequently these projects tended to become rapidly obsolete.

Edgefinity IoT healthcare solutions closes this major gap, enabling implementation of RFID projects in a few weeks, without any risky specific developments. Edgefinity offers healthcare providers an end-to-end solution, including software and hardware.

Edgefinity IoT Overview

Edgefinity IoT is real time tracking software for organizations looking to gain real time visibility across large industrial environments. Track hospital assets, inventory, and equipment in real time with Edgefinity IoT. CYBRA's RFID asset tracking system combines with RTLS to offer healthcare providers with a real time track and trace software solution.

Search in Real-Time

Within Edgefinity IoT, you can add all the assets, goods and devices you want to track. Once loaded into Edgefinity, you can track and search for items, and find their exact locations on your facility's maps.

Monitor Equipment

Lower equipment replacement costs by tracking the usage of your expensive equipment and reusable assets. Monitor tools and equipment to know when service or maintenance is needed.

Track Inventory

To make the most of your budget, maintaining accurate inventory information is key. Receive alerts when items run low. And, running cycle counts only takes minutes, so you're always up to date.

Search in Real-Time

Within Edgefinity IoT, you can add all the assets, goods and devices you want to track. Once loaded into Edgefinity, you can track and search for items, and find their exact locations on your facility's maps.

Rapid R.O.I.

Edgefinity IoT offers rapid Return On Investment due to its ease of installation, no hardwired infrastructure requirements, and scalability both in coverage and functions.

Optimized Asset Use

Ensure expensive equipment won't get lost and is constantly being used in an optimized fashion to maximize work flow, and prevent the purchase of unnecessary new equipment.

Interested? Let's Talk.

Leading software vendors such as Manhattan Associates and thousands of customers worldwide rely on CYBRA's award-winning software to save time and money. We can show you how to implement a scalable RFID inventory asset and management system.
