[MarkMagic Add-On] 2D Laser Barcode

Add 2D Barcodes to Your Forms & Labels Easily

The MarkMagic 2D Option makes it easy to print PDF417, UPS MaxiCode, QR Code, and DataMatrix 2D Barcodes on Hewlett-Packard PCL5 and IBM AFP/IPDS laser printers. 2D barcodes are capable of storing far more information than previous bar code types. Because 2D bar code symbologies are “portable data files,” able to encode entire packing lists or shipping label addresses, these bar code types are now specified by a number of carriers for their labels.

Add 2D Barcodes

Easily comply with industrial requirements such as GS1, FDA, ISO, and US FDA Unique Device Identification (UDI) system compliance for medical devices.

Increased Data Storage

2D barcodes can store more data than regular 1D barcodes. This is useful for encoding serial numbers, batch numbers, expiration dates, and other key info within a single barcode.

Enhanced Accuracy

2D barcodes lower the risk of misreads common with 1D codes. Thanks to error correction, they can still be scanned even if partially damaged or obscured.

Benefits

MarkMagic was designed from the beginning to adapt to new bar code symbologies and printer technologies, and 2D laser bar code printing is no exception. Using the MarkMagic 2D Option for printing forms means you can concentrate on designing forms that fit your business requirements.

Features

- » Create UPS MaxiCode 2D bar code symbols
- » Create PDF-417 2D bar code symbols
- » Create DataMatrix 2D bar code symbols
- » Compatible with MarkMagic PrintMonitor Add-On
- » Compatible with MarkMagic FormWeaver Add-On Option
- » Compatible with PDF/Email/Fax Add-On

Deploy **2D** Barcode Label Printing

Print 2D barcode labels with your standard laser printer. In addition, certain industries, particularly those that ship directly to the consumer, require that the shipping document contains both a pick ticket and a FedEx Ground or UPS carrier labels, or other shipping labels with 2D barcodes.

Compatible Add-ons

- » PrintMonitor
- » 2D Laser Barcode
- » PDF / Email / Fax

Prerequisites

- » MarkMagic 5.1 or later
- » OS/400 V4R5 or later
- » Any supported MarkMagic printer

Recommended Application

- » FedEx Ground Carrier Labels
- » UPS Carrier Labels
- » Catalog merchant shipping documents
- » e-commerce shipping documents
- » OSHA documentation
- » Insurance company forms
- » Pharmacy forms

Supported 2D Barcodes

QR Codes
