[MarkMagic Add-On] PDF / Email / Fax

Create Adobe Acrobat PDF files with barcodes
Need PDF files with barcodes? Here's your solution. The MarkMagic PDF Fax Email Option makes it easy to create, fax, and e-mail PDF files that look just like your original MarkMagic forms or labels.

Send Emails Automatically

Email and/or fax MarkMagic files and PDFs automatically, straight from your server. It's easy – built right into MarkMagic is the "Work With MarkMagic Email Information" tool.

Fax from the iSeries

Send documents via fax. Any format designed using HPPCL5, HPLJ4P or AFPDS printer device types can be faxed directly from the iSeries.

Combine MarkMagic Add-ons

You can print statements as you normally do. PrintMonitor can separate the output by customer, and let this add-on email or fax the statements based on customers preferences.

Value

Using this add-on for printing (or reprinting) labels and forms means you can deliver MarkMagic documents to any e-mail or fax recipient.

Adobe PDF files are searchable for words appearing in the text, and the bar codes in the PDF files are readable by barcode scanners. This does away with printing and shipping printed forms to remote recipients.

Recommended Application

» Invoices
» Statements
» Purchase Orders
» RMA Labels
» Sales Quotes
» Shipping Labels and Forms
» Insurance company forms generation

Share MarkMagic Files
Electronically

The PDF Fax Email Add-On makes it easy to share any MarkMagic document with customers or suppliers. Start by integrating PDF printing and e-mailing or faxing to communicate with your suppliers. Save money by adding the capability to your company web site or telephone system auto attendant for customers to have invoices or statements e-mailed or faxed to them without operator intervention.

Recommended Application
- » Invoices and statements
- » Shipping documents
- » Pick tickets
- » Bar code and RFID labels
- » Garment tickets
- » UCC 128 compliance labels
- » Any MarkMagic document

Benefits
The MarkMagic PDF / E-mail / Fax Option makes it easy to share any MarkMagic document with customers or suppliers. Start by integrating PDF printing and e-mailing or faxing to communicate with your suppliers.

Then, imagine how much money you could save by adding the capability to your company web site or telephone system auto attendant for customers to have PDF files of invoices or statements e-mailed or faxed to them without operator intervention.

Prerequisites
- MarkMagic 5.1 or later
- OS/400 V5R2 or later
