[MarkMagic Add-On] RFID Quick Comply

Generate RFID tags on demand and handle exceptions.
The MarkMagic Quick Comply RFID add-on makes it easy to print RFID tags so you can comply with EPC (Electronic Product Code) compliance specifications from such trading partners as Wal-Mart, Target Stores, Lowe's, and many others.

You can even implement other "smart label" applications on major platforms such as IBM Power Systems (AIX, AS/400, iSeries, System i), Linux, Unix, and Microsoft Windows platforms.

Fast RFID Tag Compliance

Simplifies the process of generating compliant RFID labels for industry mandates, ensuring smooth operations.

Improved Accuracy and Efficiency

Reduces manual data entry errors and speeds up RFID label creation, enhancing supply chain visibility.

Versatile RFID Support

Compatible with various RFID printers and encoding standards, making it adaptable to different industry requirements.

Value

Generate RFID tags on demand while effortlessly handling exceptions. Keep up with RFID standards without slowing down your operations.

RFID Quick Comply acts as a seamless bridge, making it easy to transition from your existing barcode labels to RFID—no complex setup, no disruptions.

Supported RFID Tags

» UHF EPC Class 1 Gen 2 (Various manufacturers)

» HF TagIt tags (Texas Instruments)

» HF I-Code tags (Philips)

» HF ISO 15693 tags (Various manufacturers)

Add RFID Tags to Your Forms and Labels

Stay Compliant Today.

Be Ready for Tomorrow.

Using MarkMagic RFID Quick Comply for

source encoding of "smart labels" means not only will you achieve RFID compliance today, but you will be able to keep up with the changing compliance requirements.

Benefits

- » Auto-generate EPCs based on data rules
- » Print & encode smart labels in one seamless step
- » Support multiple retailers' specs from one template
- » Validate RFID output to ensure compliance before shipping
- » Handle exceptions and fix tag issues on the fly
- » Avoid chargebacks from failed or non-compliant tags
- » Update label formats fast when retailer rules change
